SAMPLE QUESTIONS: C_SUPDEV_01

SAP Certified Development Associate – Sybase Unwired Platform (SUP) 2.1 Mobile Application Developer

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. You are part of an architecture design team whose aim is to incorporate Sybase Unwired Platform into your company's mobility offering. Of primary concern are client concurrent connections. Your IT project team has asked for your recommendation on steps to ensure that the platform minimizes opportunities for bottlenecks. What would you recommend?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	Create server and data tier clusters
b)	<input type="radio"/>	Install a relay server farm
c)	<input type="radio"/>	Install a third-party monitoring utility and force drop inactive connections
d)	<input type="radio"/>	Only use DCNs to update the CDB and limit device application online lookup

2. Which of the following not a supported backend integration option for the Sybase Unwired Platform?

Please choose the correct answer.

a)	<input type="radio"/>	JDBC (databases)
b)	<input type="radio"/>	Web services (SOAP and REST)
c)	<input type="radio"/>	SAP (JCO, OData, Web services)
d)	<input type="radio"/>	Flat file (CSV & fixed width)

3. When creating an MBO, what does the top-down approach imply?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	The EIS data source may not yet exist.
b)	<input type="radio"/>	Operations will be created automatically.
c)	<input type="radio"/>	Attributes need to be mapped manually.
d)	<input type="radio"/>	The EIS data source exists at creation time.

4. Which of the following statements are true regarding an LBO?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	LBOs can only define create, update and delete operations.
b)	<input type="radio"/>	Relationships can be created between LBOs and MBOs.
c)	<input type="radio"/>	LBOs cannot be filtered or synchronized with the consolidated database.
d)	<input type="radio"/>	LBOs can be created by dragging and dropping a data source onto the Mobile Application Diagram

5. Which of the following is not a supported Web technology for the Hybrid Web Container application?

Please choose the correct answer.

a)	<input type="radio"/>	HTML
b)	<input type="radio"/>	Javascript
c)	<input type="radio"/>	Cascaded Style Sheets (CSS)
d)	<input type="radio"/>	Active Server Pages

6. When a Mobile Workflow application is generated, workflow_CustomLookAndFeel.html is created. Which device platform will this be used on?

Please choose the correct answer.

a)	<input type="radio"/>	iPhone
b)	<input type="radio"/>	BlackBerry 6
c)	<input type="radio"/>	Nokia
d)	<input type="radio"/>	BlackBerry 5

7. Which of the following are supported by the Sybase Unwired Platform for an iOS native application development?

Please choose the correct answer.

a)	<input type="radio"/>	Snow Leopard and Xcode 4.0
b)	<input type="radio"/>	Lion and Xcode 4.0
c)	<input type="radio"/>	Snow Leopard and Xcode 3.0
d)	<input type="radio"/>	Lion and Xcode 3.0
e)	<input type="radio"/>	Snow Leopard and Xcode 3.1

8. Which of the following are valid DCN command types?

Note: There are 2 correct answers to this question.

a)	<input type="radio"/>	DCN with payload
b)	<input type="radio"/>	Regular DCN
c)	<input type="radio"/>	WF-DCN
d)	<input type="radio"/>	DCN without payload

9. Different security providers give the Unwired Server security features that include authentication and authorization capabilities. Configuration of security providers for the Sybase Unwired Server is accomplished via the Sybase Control Center. Which security provider allows the operating system's security mechanism to validate user credentials using the Windows native OS?

Please choose the correct answer.

a)	<input type="radio"/>	NTProxy
b)	<input type="radio"/>	LDAP
c)	<input type="radio"/>	SAP SSO Token
d)	<input type="radio"/>	HTTP Basic Authentication

10. You want to start your Sybase Unwired Server but it fails. In which of the following log files can find information that will help you to resolve this issue?

Please choose the correct answer.

a)	<input type="radio"/>	default.log
b)	<input type="radio"/>	bootstrapxxxxxxxxx.log
c)	<input type="radio"/>	errorlog.txt
d)	<input type="radio"/>	YourMachineName-server.log

Solutions

1 a) Correct	2 a) Incorrect	3 a) Correct	4 a) Correct	5 a) Incorrect
1 b) Correct	2 b) Incorrect	3 b) Incorrect	4 b) Incorrect	5 b) Incorrect
1 c) Incorrect	2 c) Incorrect	3 c) Correct	4 c) Correct	5 c) Incorrect
1 d) Incorrect	2 d) Correct	3 d) Incorrect	4 d) Incorrect	5 d) Correct
6 a) Incorrect	7 a) Correct	8 a) Incorrect	9 a) Correct	10 a) Incorrect
6 b) Incorrect	7 b) Incorrect	8 b) Correct	9 b) Incorrect	10 b) Correct
6 c) Incorrect	7 c) Incorrect	8 c) Correct	9 c) Incorrect	10 c) Incorrect
6 d) Correct	7 d) Incorrect	8 d) Incorrect	9 d) Incorrect	10 d) Incorrect
	7 e) Incorrect
