

## BI – Business Intelligence Accelerator

### BW361

---

#### Goals

- Participants will gain an overview of the functions and administration tasks of the Business Intelligence Accelerator.
- Identify and pursue opportunities to use SAP NetWeaver integration tools and solutions to improve the way your business implements key processes.
- Provide a conceptual overview of the NetWeaver stack and the included components.

#### Audience

- Solution consultants responsible for implementing SAP NetWeaver - Business Intelligence
- Solution Architects, Technical Consultants, Project managers and project team members involved in the design or optimization phase of a SAP NetWeaver - Business Intelligence implementation

#### Prerequisites

##### **Recommended**

- Experience in SAP NetWeaver – Business Intelligence

#### Course based on software release

- SAP NetWeaver BI 7.0

#### Content

- Introduction to BIA
  - BIA Architecture & system environment
  - BI system landscape
  - Scenarios for using BIA
  - Benefits
- Administration of BIA
- Monitoring
- Troubleshooting

# Notes

- Course length: 2 hours
- The e-learning includes several demos using NetWeaver 7.0 components.
- This e-learning contains examples of common technology demands and how SAP NetWeaver meets those demands. The goal is not to learn how to use all the aspects of the NetWeaver stack, but rather to give you an integrated understanding of NetWeaver functionality and how all the component work together to provide an integrated business solution to technology demands.
