

SAP BusinessObjects Web Intelligence XI 3.0: Advanced Report Design

BOW320

Goals

- BusinessObjects™ Web Intelligence™ is a query, reporting and analysis tool that allows you to access the data in your corporate databases directly from within BusinessObjects Enterprise™ InfoView™ and to present and analyze this information in a Web Intelligence document.
- This one-day instructor-led classroom course is designed to give you the comprehensive skills needed to apply alternative query and reporting techniques when creating complex Web Intelligence documents. After completing this course, you will be able to create combined queries and use sub-queries.
- You will also be able to use character and date string functions, create variables using "If" logic, redefine calculation contexts, and create hyperlinks in your documents using Web Intelligence dialog boxes.

Audience

- The target audience for this course is report designers who are experienced Web Intelligence users and who need to create complex Web Intelligence documents.

Prerequisites

Essential

- [BOW310](#) SBO Web Intelligence XI 3.0/3.1: Report Design

Recommended

- Experience in designing Web Intelligence reports

Content
